

Strata Health Solutions and UHN win the 2015 Project Team Implementation award at the Canadian Health Informatics Awards.

June 25th, 2015

Strata Health Solutions would like to recognize the University Health Network (UHN - SIMS) for winning the "Project Implementation Team Award" for the implementation of an electronic resource matching and referral system (RM&R) to send and receive adult inpatient palliative care referrals for 14 organizations in Toronto.

In collaboration, Strata Health Solutions and SIMS have made an outstanding contribution to adult inpatient palliative care in Toronto. Their teamwork means clinicians no longer have to rely on faxes, phone calls or emails to refer a palliative patient. All the required information is housed in RM&R, with clinicians able to respond to referral requests in real time and accelerate the acceptance process. They can also view a patient's status through the application and make timely decisions.

About Strata Health Solutions

Strata Health leverages technology to achieve dramatic patient flow improvement within health systems. Since 2001, over 1.1 Million referrals have been completed within the existing 35 care streams (referrals paths) demonstrating powerful results across the entire care continuum. Strata Health is based in Canada (Calgary Vancouver, Toronto, Montreal, Quebec.), in the UK (Dartford, Kent) and in France (Paris). For more information, visit: www.stratahealth.com

About University Health Network

University Health Network consists of Toronto General, Toronto Western and Princess Margaret Hospitals. The scope of research and complexity of cases at University Health Network has made it a national and international source for discovery, education and patient care. It has the largest hospital-based research program in Canada, with major research in transplantation, cardiology, neurosciences, oncology, surgical innovation, infectious diseases, and genomic medicine. University Health Network is a research hospital affiliated with the University of Toronto.

About Shared Information Management Services

Shared Information Management Services (SIMS) is the enterprise information management and technology department at University Health Network. It also partners with other organizations to develop regional and provincial healthcare information management and technology solutions.
